**SWIVEL POINT
CANT HOOK**

AT&T PATTERN PIKE POLES

Two and one-half inches in diameter at the center, tapering to 2" at both ends. This gives extra strength at the middle, just where it is needed, yet the tapered ends make the pole lighter and easier to grip.

OSHKOSH - CANT HOOKS

These cant hooks are well known in the pole line field. They are fitted with handles made of selected air seasoned hardwood and high grade malleable iron fittings. The hooks are shaped and hammered out of crucible steel. The entire tool is well balanced.

In addition to the standard models, a Swivel Point cant hook has been designed to meet the need for a cant hook which will not scar the pole and will allow a grip on the pole even if a knot is encountered. The hook will swivel over and the other point will penetrate.

Part	Size	Description	Hndl.
199-5	2-1/2" x 4'	Tool w/ #5 Hook	575T
199-7	2-1/2" x 4'	Tool w/ #7 Hook	575T
199	2-1/2" x 4'	Cant Hook	576T
3994	2-1/2" x 4'	Tool w/ Swivel Pt.	576T
