

Tooling solutions for the power utility industry.

ALTURNAMATS[®] ENVIRONMENTALLY FRIENDLY GROUND COVER MATS

Prevent vehicles from sinking and losing traction in wet off-road situations, easily move vehicles and equipment over lawns, through mud and across soft terrain. Save on labor, bog-down time, towing charges and ground restoration fees.

Alturnamats[®] feature a slip resistant diamond plate surface on both sides, and are interlacable to create an entrance track with less damage to the landscape.

These super tough polyethylene mats are virtually indestructable, resistant to cleaners, solvents and UV rays. They have been field tested in record breaking cold, as well as intense summer heat. Flexible enough to support tons of equipment, yet the 1/2" thickness allows easy storage and manageable weight.

Alturnamats[®] promise to make your work easier and faster in situations where access is uneven, unpaved or great care is needed to protect lawns.

More durable than plywood.

Low-cost alternative to fiberglass reinforced mats.

Able to survive years of hard use.

Easy to transport.

Handi-hooks are available for easier handling on site.

Virtually maintenance free.

**AVAILABLE IN FOUR
EASY-TO-USE SIZES**

2' x 4', 2' x 6', 2' x 8', 4' x 8'
