REL-HOT-1

Single Acting 10,000 psi Hydraulic Hotstick Extension

This light weight hydraulic extension will accept almost any single acting crimping, cutting, or spearing head for hotstick applications.

A 1-1/4 inch insulated fiberglass pole and an internal non-conductive high-pressure hose assembly allow the operator to work at a safe distance without sacrificing tool control.

Connect the extension to any S/A tool head.

Connect to any high pressure source.

(Gas or electric pump, or intensified tool circuit)

Perform desired task from a safe distance.

Standard length of 6 or 8 foot.

Custom lengths are available.

Consult Reliable for more tool options.

Rubber Gloves, sleeves, and/or protective apparel may be required for optimum operator safety.

Consult the guidelines established by your regulating authority.
