

REL-ST

MANUAL SPEARING TOOL

REL-ST-P MOIL POINT

REL-ST-C CHISEL POINT

REL-ST-E EXTENSION

Eleven foot Manual Underground Spearing Tool was designed to be driven into the conductor by striking the end cap, piercing the conductor and ensuring that the it is out of service prior to beginning work.

The REL-ST spearing tool may be extended by removing the threaded end cap and adding optional 5 foot sections, ensuring proper tool length and maintaining a safe working distance with operator outside of the manhole.

FEATURES:

- Lightweight
- 11 foot standard length
- Available with moil point or chisel point
- Extendable with REL-ST-E, 5 foot sections
- 1-1/4 inch insulated fiberglass pole.
- Cap retention lanyard
