ST-200

SINGLE ACTING HYDRAULIC
SPEARING TOOL

The Reliable Equipment **ST-200** single acting hydraulic spearing tool allows the operator to test for energized cable from a safe working distance. This tool features a 6 ton ram and an all aluminum cable retention body. Two sliding plates hold the cable while a spear is driven through the center of the cable. A grounding bolt is attached to the housing for easy grounding cable hook up. The **ST-200** operates from any 10,000 psi hydraulic pump or Intensifier and is typically used with a 25' nonconductive high pressure hose. When the spear is completed and the pump pressure is released, the ram will retract without the spear. After removing the speared section, the probe can be used again.

ST-200 Spearing Tool & 20 Probes

ST-200K Spearing Tool Kit

20 probes, 25' H.P. hose,
hand pump, and carrying bag.

SPECIFICATIONS

Weight	7.0 lbs.
