REL-MAWC

Multi Angle Wire Clamp/Cable Vise

This tool will serve as the extra hand you always wished you had when working with cable. The MAWC works like a bench vise. If you have used a vise grip you already know how this tool works!

Light weight and easily reconfigurable this tool will grab on to any clamp-able surface and hold the cable securely where you need it.

Allowing use of both hands for greater control, safety, and convenience. Permits more accurate stripping measurements. Excellent for preparation of cable terminations, splices and connections.

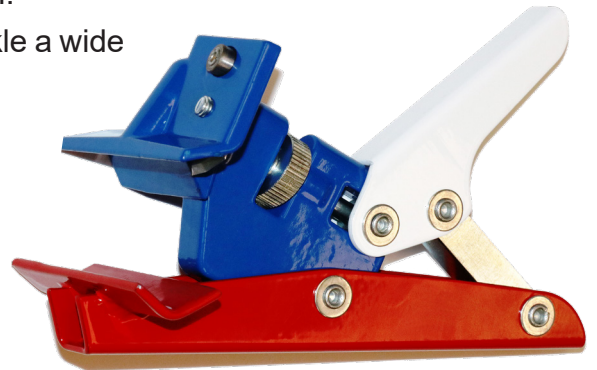

Versatile Field Tool - Pivoting vise pads can be mounted on a concrete block, bucket wall, lip, truck bed, or gate. Two universal joints provide a multitude of mounting angles for proper cable positioning and maximum convenience. The wire gripping pads have multiple channels to secure all sizes of cable from 6AWG to 750KCM.

Combined with the **R-CS-1932** stripping tool this duo will tackle a wide variety of cable end or midspan applications with ease.

Size: 10"X12"X4"
Weight: 5.5 lbs.
Cable: #6-750 AWG
