

# RELIABLE EQUIPMENT & SERVICE CO., INC.

## REL-CR

Up to 1,600 feet of 1/4" wire rope or cable may be coiled onto the reel.  
(Max. cable storage 200 lbs.)

### REL-CR - Collapsible Reel

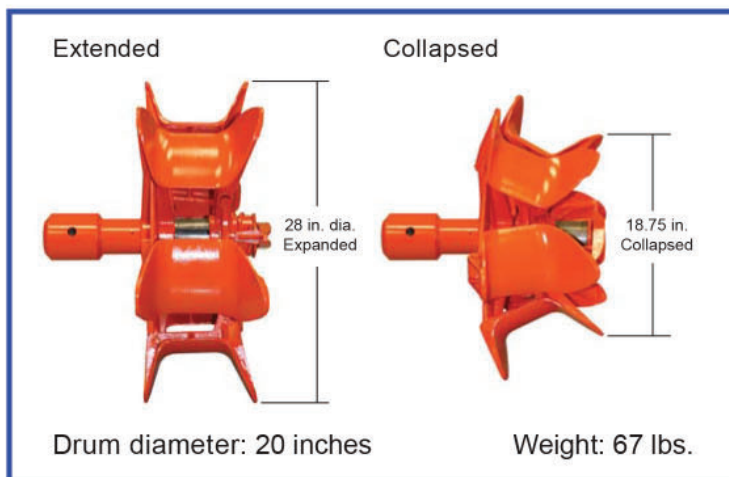

The **REL-CR** reel may be used in take-up and stringing applications requiring up to 4,000 pounds of pulling force.

A half turn of the handle collapses the outer rim. The rim segments pivot inward when the sliding spider is released, allowing removal of the wire or cable spool.

Set the reel by lifting outer rim segment while turning handle into the spindle.

The CR reel mounts onto any 2-7/16 bayonet or pin type winch shaft.

### DO NOT USE FOR ROPE/TAPE STORAGE

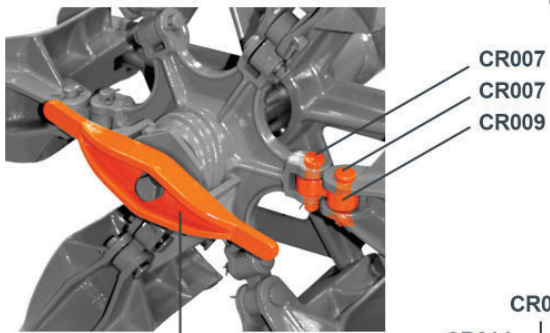

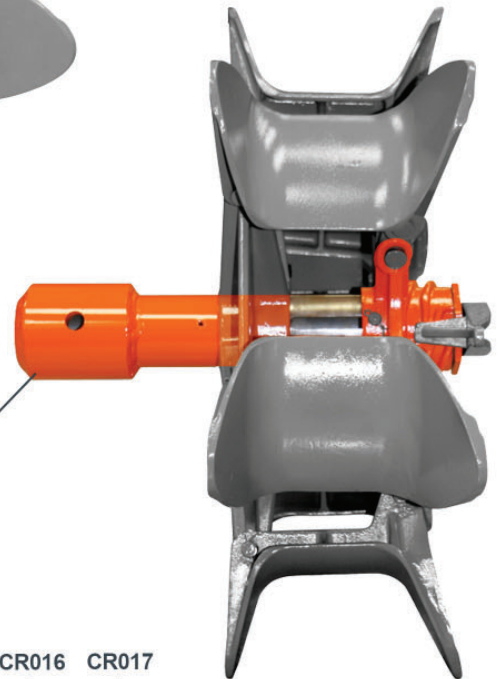

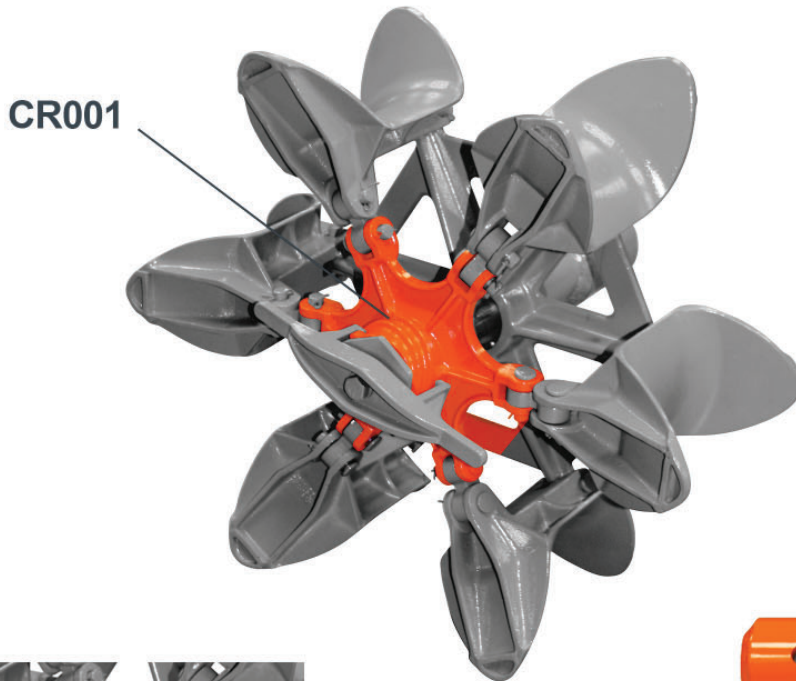

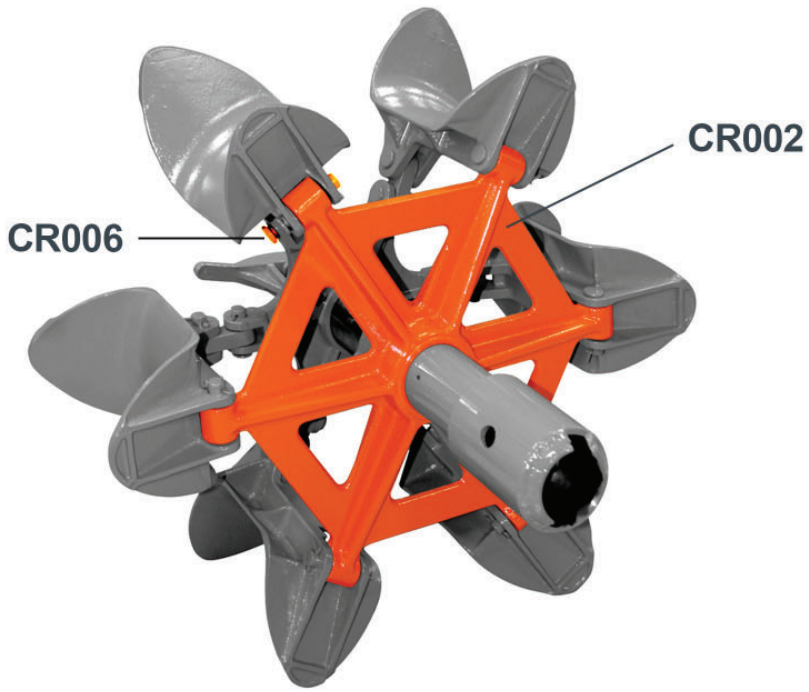

**REL-CR** may be used as a capstan for pulling of poly rope or tape, where the reel will be used as a pulling capstan ONLY. Excessive wraps of poly rope or mule tape may cause failure, voiding warranty. (3 wraps Max.)
